

mohamed mostafa mahfouz

Computer Science student

 mohamedmostafa7474@gmail.com  01144727253  Giza Egypt  LinkedIn  GitHub

Objective

Computer Science student with strong skills in front-end development using React and back-end solutions with Node.js and Express. Passionate about creating user-friendly, efficient applications and eager to grow within collaborative teams.

Education

Bachelor's Degree in Computer Science and Artificial Intelligence (Information Systems), Helwan University 10/2022 – 07/2026
GPA: 3.1

Skills

Front-End Development React, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion	Back-End Development Node.js, Express.js, REST APIs, JWT Authentication, Sequelize (MySQL), Mongoose (MongoDB)
Big Data & Processing Apache Spark, Kafka, MapReduce, Pandas, NumPy, Matplotlib	Databases MySQL, MongoDB, SQLite
Programming Languages JavaScript (ES6+), TypeScript, C/C++, SQL	Tools & Technologies Git, GitHub, Docker, Postman
Computer Science Fundamentals Object-Oriented Programming (OOP), Data Structures and Algorithms	Interpersonal Skills Management, Organization Skills, Problem Solving, Communication, Teamwork.

Courses and Certificates

- Full-Stack Web Development Track, Route Company**
- Built front-end projects using React, TypeScript, Redux, Bootstrap, Tailwind CSS, and Framer Motion for responsive design and animations.
 - Developed back-end projects with Node.js, Express.js, SQL, Sequelize, Mongoose (MongoDB), and JWT Authentication.
 - Practiced RESTful API design, database modeling, and version control with Git/GitHub.
 - Gained hands-on experience in UI/UX fundamentals, debugging, testing, and deployment workflows.

Projects

- Sara7a-App — Backend Messaging Platform** Aug 1 – Sep 15, 2025
- Built a backend app simulating saraha.com using Node.js (Express.js) and MongoDB (Mongoose).
 - Implemented JWT authentication, Joi validation, secure data handling (bcrypt.js, crypto-js, Helmet, rate limiting), file uploads with Multer, and email services with Nodemailer.

FreshCart

Aug 20 – Sep 18 , 2025

- Front-end e-commerce web application built with React.js, styled with Tailwind CSS and enhanced with Framer Motion animations.
- Implemented API integration, Context API for state management, React Router for navigation, and shopping cart functionality with clean UI/UX practices.

ArtGallery Platform

Mar 2 – Apr 28 , 2025

- Full-stack web application for real-time artwork auctions. Built using .NET 9 and React.js with a microservices architecture. Each service is containerized using Docker and connected to a separate SQL Server database.
- Supports authentication, artwork management, and real-time bidding via SignalR.

AI Tic-Tac-Toe Game

Nov 1 – Dec 15, 2024

- Designed an AI-powered Tic-Tac-Toe (X/O) game using Python.
- Implemented Minimax Algorithm for optimal decision- making. Enhanced user experience with an interactive interface.
